

Telstra Cloud Sight™

A simple, secure and cost effective way to manage cloud

Cloud Services promise greater flexibility and agility than other IT solutions, but if they aren't managed properly the risks can quickly outweigh the benefits. Data security can be compromised, budgets can blow out and you may struggle to comply with regulatory standards.

Telstra Cloud Sight™ is a powerful web-based platform that simplifies the way businesses buy, deploy and manage multiple public cloud services and associated network connectivity all through a single portal.

Features

Multi Cloud Procurement

Buy, deploy and manage your Telstra purchased multi-cloud environments from within a single portal using a simple and easy to use wizard that guides you through the set up of public clouds via partners such as AWS and Azure.

Telstra Cloud Connector™

A one-stop solution to privately, securely and reliably connect your public cloud environments to your Telstra Next IP@ network via Cloud Sight.

Budget Controls

Track your spend across multiple providers through a single pane of glass, set account level budgets and automate spend alerts. Track how you are trending with a view of current month against your budget, Improve forecasts by using historical spend and identifying high cost services.

Resource Scheduling & Tagging

Make use of tags across your cloud accounts based on different projects or cost centres to monitor spend. Monitor your usage and schedule downtime to conserve resources and cloud spend.

Security & Compliance

Easily set up accounts using Industry best practice security and compliance blueprints.

Access Management

Role based access management with auto task assignment, supported by detailed user level audits and reporting.

Benefits

Complete control and peace of mind

Easy to use self-service portal puts you in control, enabling you to quickly and easily purchase, provision and consume multiple cloud services and cloud connectivity solutions from partners such as AWS and Azure, including Telstra's own Cloud Connector all from the one portal.

Make informed decisions and increase operational efficiency

Use the Cloud Sight dashboard to make informed decisions for your business by accessing service level cost visibility of your cloud environments at a single glance. Upgrade to marketplace offerings such as Cloud Health from Telstra to gain deeper insight and trends to your cloud spend. Improve resource utilisation through automatically powering off resources when they are not in use.

Reduce your business risk in the cloud

Obtain control of your compliance status to keep your data safe and your cloud environment compliant to protect against costly data breaches and intrusions that can result from misconfiguration and/or mismanagement. User access and user level auditing to ensure additional security over Cloud Sight portal operations.

Why Choose Telstra?

Single Management Portal

Telstra Cloud Sight enables you to buy, deploy and manage your Telstra purchased multi-cloud environments from within a single portal.

Multi Cloud Provider

As a multi-cloud provider, we offer choice and flexibility with an expanding range of leading public cloud platforms, which you can link with the Telstra Next IP high bandwidth network for reliability and security.

Telstra Purple

As the largest Australian owned technology services business, our national network of over 1,500 certified network, security, cloud, collaboration, mobility, software, analytics, and design experts to help you deliver outcome-based, transformative tech solutions.

Telstra Cloud Concierge
