Financial Services

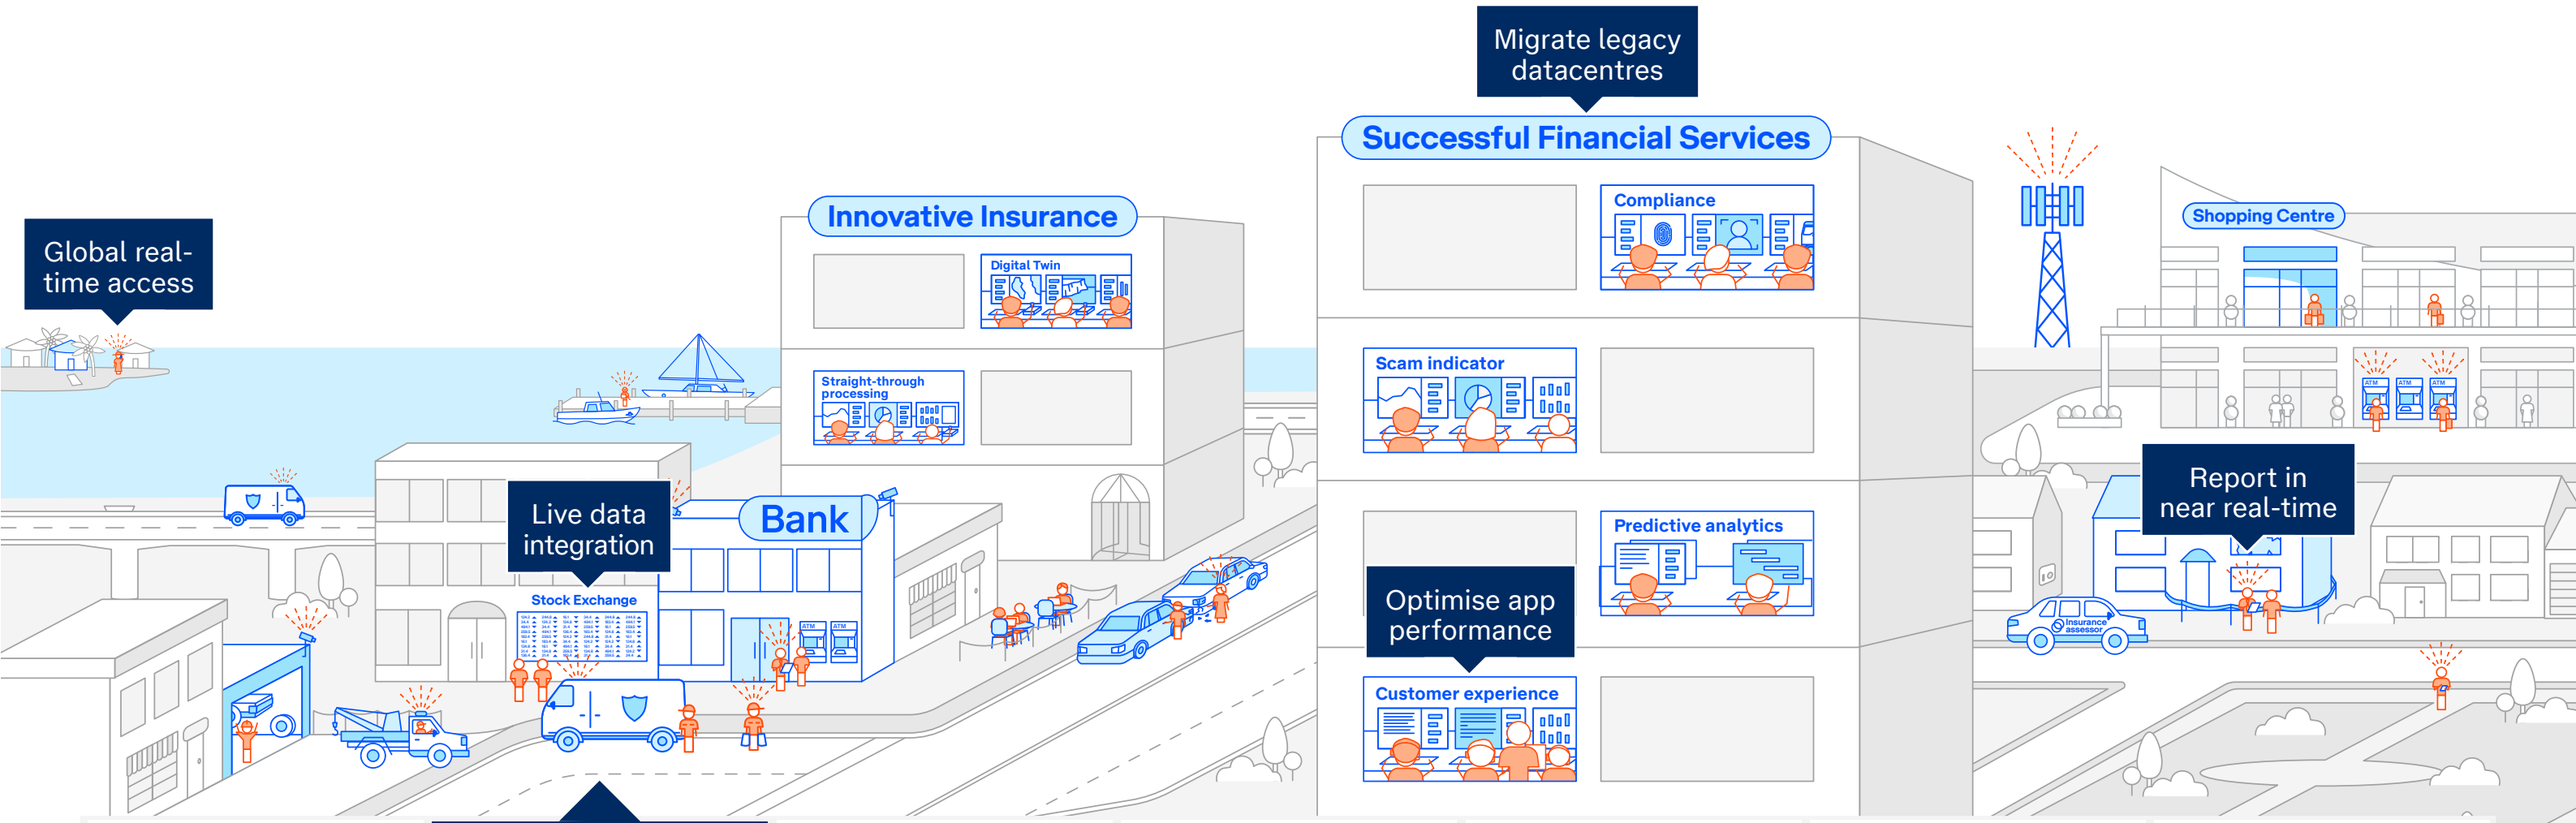
With an end-to-end view of your operations, you can harness huge amounts of information effectively to better predict variations, such as customer preferences, market patterns and competitive pressures. You'll be able to create more personalised and profitable products and services, while reducing the risk of fraud.

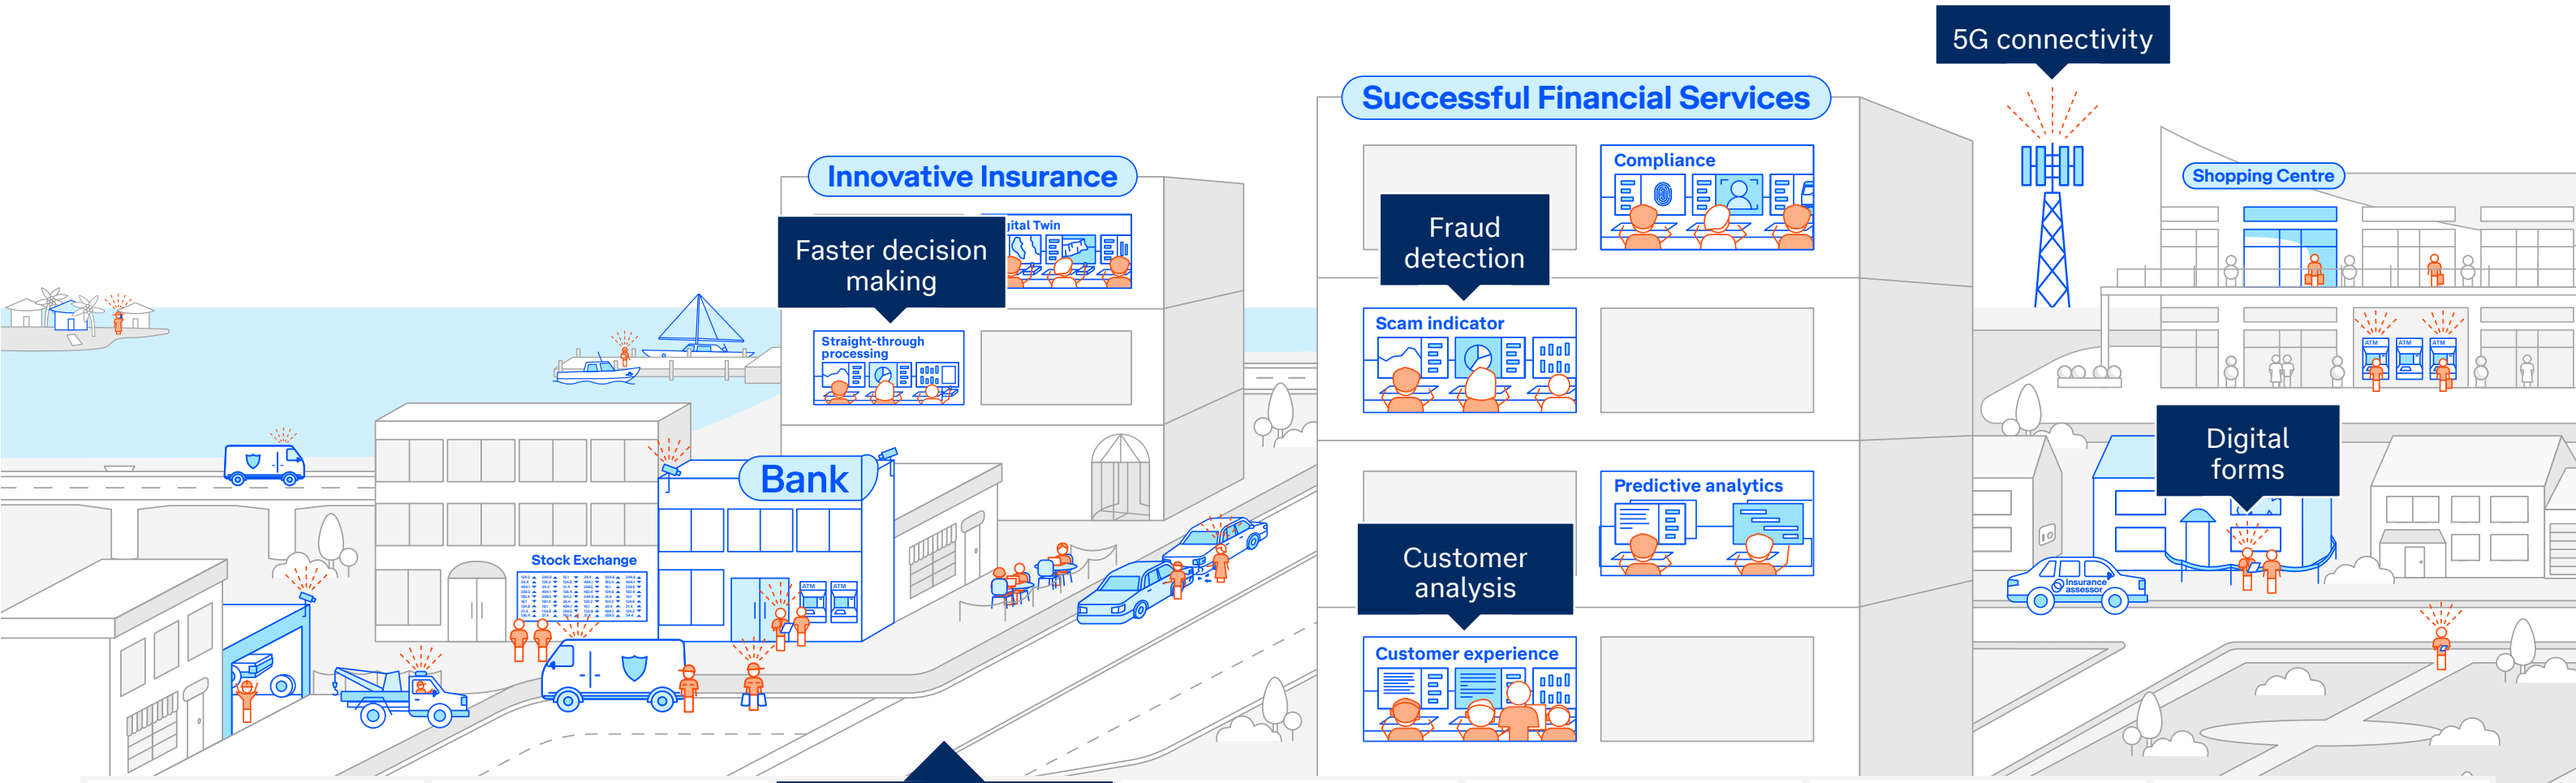
Financial Services



Optimise operations | **Modernise cloud** | Automate processes | Customer experiences | Empower employees | Manage compliance | End-to-end security

Innovate with confidence thanks to end-to-end control over your hybrid and multi-cloud, and your network. Telstra can migrate legacy datacentres to the cloud to unify systems and gain business agility and data visibility. Fine tune workloads and application pathways from the cloud to the network edge – optimising cost, security and performance.

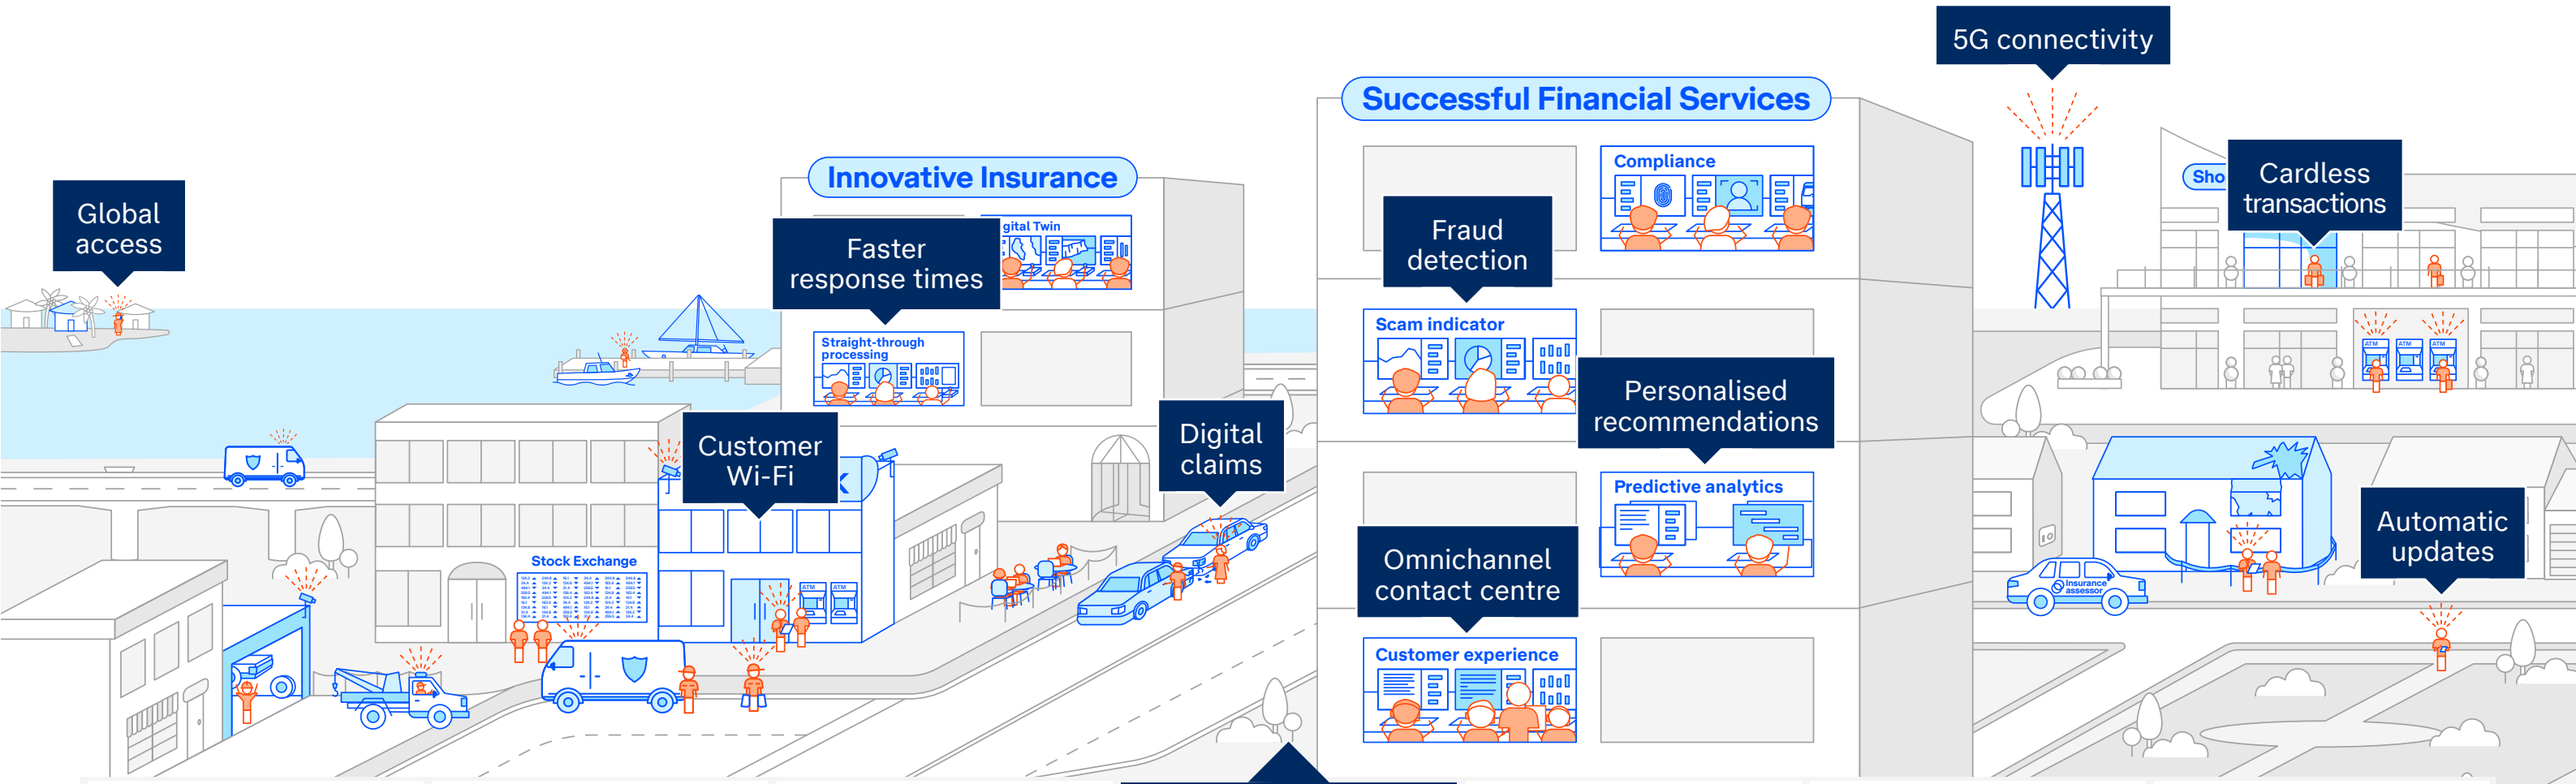
Financial Services



Optimise operations | Modernise cloud | **Automate processes** | Customer experiences | Empower employees | Manage compliance | End-to-end security

Make automation fast and effective so you can implement innovative change as soon as it makes sense to do so. We can help you deploy advanced analytics, AI and ML to automate straight-through processing, making it easy to streamline systems and speed up decision-making.

Financial Services



Optimise operations | **Modernise cloud** | **Automate processes** | **Customer experiences** | **Empower employees** | **Manage compliance** | **End-to-end security**

Set the groundwork for inspiring and secure customer experiences by connecting online environments to obtain powerful data insights, maintain omnichannel consistency, protect privacy and provide hyper-personalised recommendations.
