3 DATA USERS – IPND CODES AND RELEASE HISTORY	209

1 INTRODUCTION

1.1 Purpose

The purpose of this document is to provide IPND Stakeholders a current list of all registered IPND Data Users and IPND Data Providers and Carriage Service Providers.

This document will enable IPND Stakeholders to identify relevant IPND Data Provider and Carriage Service Provider via the use of IPND Codes (filesource / CSP Code / Data Provider Code) which are assigned to individual IPND Data Providers and Carriage Service Providers by the IPND Manager at point of registration.

1.2 Scope

This document discloses details pertaining to each entity / organisation registered with the IPND Manager as an IPND Data Provider / Carriage Service Provider and IPND Data User. These details are maintained by the IPND Manager as they receive updates by the responsible entity / organisation. These details include:

- Responsible entity / organisation name including Business / Trading Name
- The release date / date of registration of entity with the IPND Manager
- Data Provider Agent Name
- Filesource Code
- Carriage Service Provider (CSP) Code
- Data Provider Code
- Notes deemed relevant by the IPND Manager
- Responsible entity / organisation Australian Business Number (ABN) as registered with the Australian Taxation Office

These details should be read in conjunction with the documents mentioned in References Section 1.3.

1.3 References

- IPND Code (C555).
- IPND Data Users and Data Providers Technical Requirements.

- IPND Data Industry Guideline (G619)

2 DATA PROVIDERS – IPND Codes and Release History

Notes:

1. Upper case only should be used for all codes.
2. File Source Code (5 Characters) is field 3 in each header record of data uploading to the IPND.
3. CSP Code (3 Characters) is field 13 and Data Provider Code (6 Characters) is field 14 of each transaction record sent to the IPND.
