SMS Messages

- 3.4 SMS offers you the ability to send short text messages from a compatible device directly to another compatible device. When you send an SMS, your phone number, the date and the time the message was sent appears on the device of the person receiving the SMS.
- 3.5 We will try to deliver an SMS for up to 7 days. If it cannot be delivered after 7 days, the SMS will be deleted from our SMS network.
- 3.6 We will take responsible steps to deliver SMS messages. However, in some circumstances the message may be undeliverable for reasons which include:
- (a) technological difficulties;
 - (b) the receiving device is not working properly, is switched off, is out of range or the message storage space on the device is full;
 - (c) the destination number is invalid or barred to SMS;
 - (d) the person is overseas and the overseas phone company has blocked SMS from us.

In such cases we will be unable to deliver the message.

- 3.7 SMS messages to fixed phone services are not suitable for telling or warning people about serious risks, important matters, time critical matters or asking emergency service organisations to come to someone's aid. A message which is sent may not be able to be delivered or may not be received by the recipient (either immediately or at all). Because of this, you should decide (and are responsible for deciding) whether a text message is the most appropriate way to deliver your message, particularly where it is important that the message be received by the recipient or where the message needs to be received or acted on within a certain time.
- 3.8 SMS messages to fixed phone services are not encrypted so it is possible that a third party could intercept an SMS during transmission or delivery.

MMS Messages

- 3.9 With an MMS capable device, MMS allows you to create and send mobile messages containing images, photos, text, audio clips and short video recordings.
- 3.10 You are responsible for MMS content you send. You must not send content that is inappropriate or offensive to the intended recipients. You must not engage in text activity that interferes with or compromises any other person's use of the MMS service (such as spamming another person).
- 3.11 You must comply with all laws when creating and sending MMS content. For example, codes of conduct or industry codes (eg those relating to gaming, advertising and privacy) and the laws concerning intellectual property (eg copyright, moral rights and trade marks). You must not send MMS content that is owned by another person without their consent.
- 3.12 If you attempt to send any MMS message that is larger than 500 kilobytes in size, your MMS message may not be successfully submitted and/or received. Most handsets support previewing of message properties, including file size.
